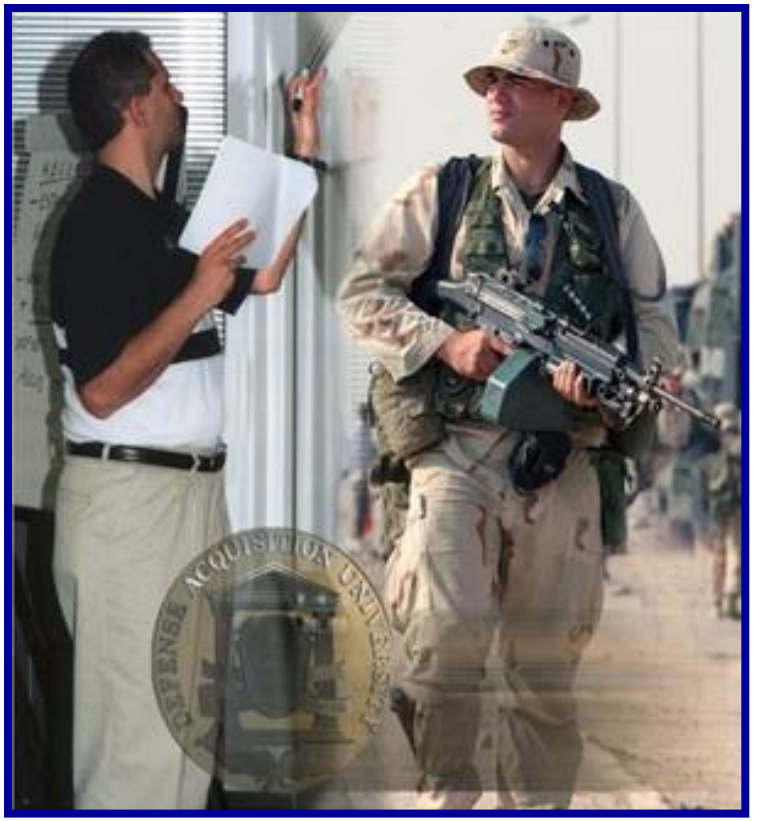
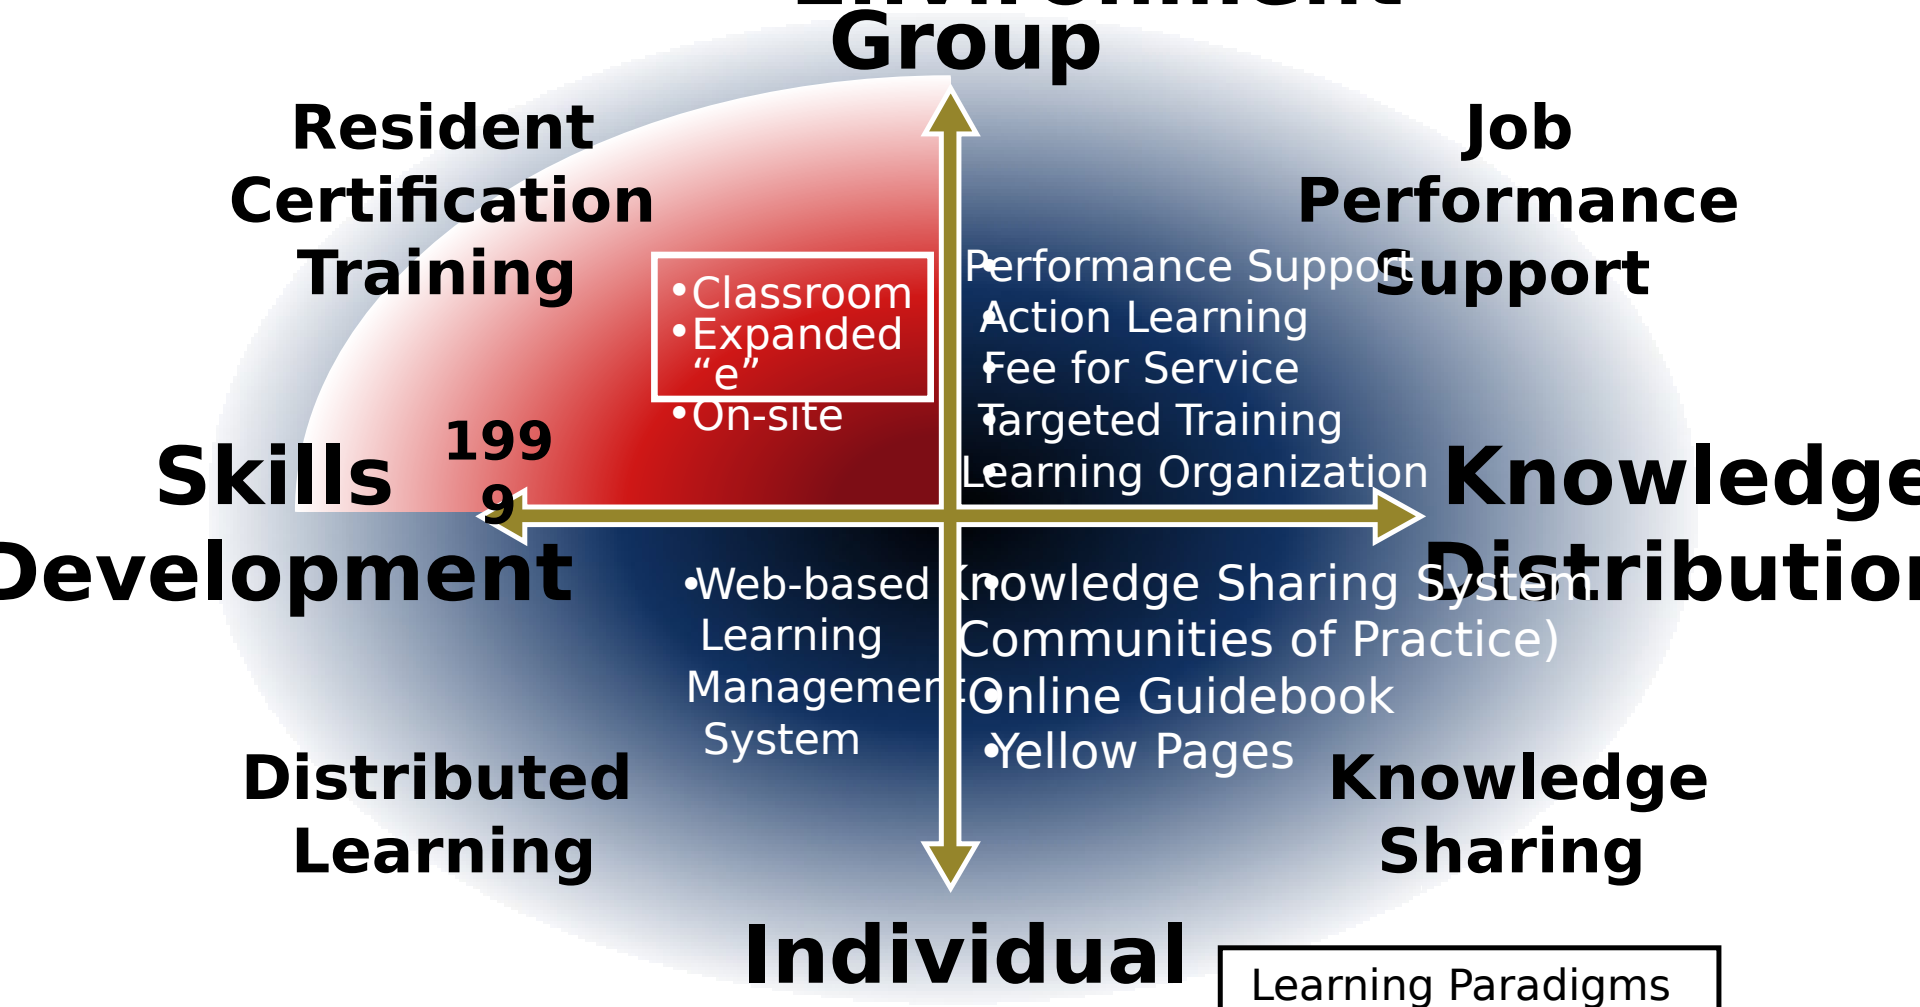
DAU Mission

Provide practitioner training to enable the Acquisition, Technology & Logistics community to make smart business decisions and deliver timely and affordable capabilities to the warfighter.

- ✓ **We train the AT&L Workforce through certification and assignment-specific courses**
- ✓ **We promote career-long learning through our Continuous Learning Center**
- ✓ **We offer performance support to the AT&L Workforce through consulting, Rapid Deployment Training, and targeted training**
- ✓ **We facilitate knowledge sharing through online resources and communities of practice**

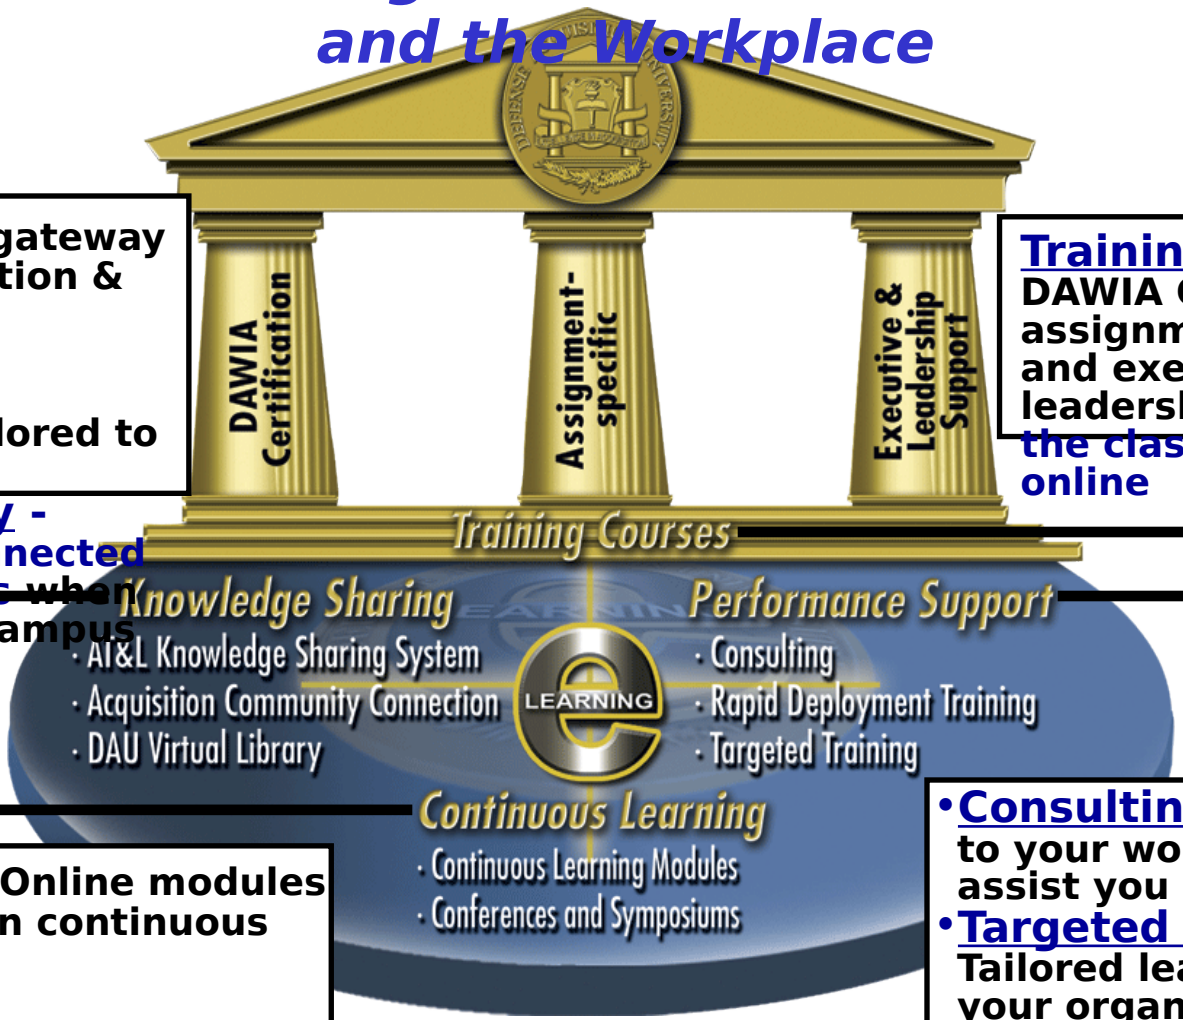


Framing the Learning Strategy for an Agile Learning Environment



AT&L Performance Learning Model

24/7 Learning Assets for the Classroom and the Workplace



- **AKSS** - Online gateway to AT&L information & tools
- **ACC** - Online collaboration communities tailored to your needs
- **Virtual Library** - Keeping you connected to research tools when you are not on campus

Training Courses - DAWIA Certification, assignment-specific, and executive & leadership courses – in the classroom and online

- **CL Modules** - Online modules to help you earn continuous learning points
- **Conferences**
  - PEO / SYSCOM
  - Business Manager
  - DAU Acquisition Community

- **Consulting** - We come to your workplace to assist you
- **Targeted Training** - Tailored learning for your organization
- **RDT** - On-site and online training on the latest AT&L policies

DAU Continuous Learning Center
The DAU Continuous Learning Center is a Department of Defense resource dedicated to the delivery of continuous learning opportunities supporting the Acquisition, Technology and Logistics (AT&L) workforce.
To fulfill the DoD AT&L requirement for obtaining 80 continuous learning points every two years, DAU Continuous Learning Center offers a wide variety of continuous learning modules, varying from one to 12 hours in length, primarily in the following areas:
Acquisition Management
Business
Contracting
Engineering and Technology
Harvard ManageMentor Plus Topics
Logistics
Program Management
Continuous Learning Modules
Register for credit - Select your organization at https://learn.dau.mil/html/clc/Register.jsp and follow registration instructions
Browse without registering - Select https://learn.dau.mil/html/clc/Clc.jsp and follow instructions for accessing the module
Continuous Learning Module Topics
Continuous Learning Module Brochure
Note: To receive continuous learning points (CLPs) for completing a module, you must register through the appropriate registration system. You will have access to the module upon completing the registration process.
Harvard ManageMentor Plus Modules
DAU is pleased to partner with Harvard Business School Publishing to provide the Harvard ManageMentor Plus modules to the acquisition workforce.
Register for Credit - Select your organization at https://learn.dau.mil/html/clc/Register.jsp and follow registration instructions.

AKSS Today!
Filter by: Organizations Career Field/Topics
WELCOME TO THE AKSS PORTAL
You are currently viewing the newly deployed AKSS Portal. The AKSS Portal, an upgrade to the AKSS, maintains most of the same menu navigation, and all of the content of the former AKSS.
This migration was done to bring the AKSS site operation and management into compliance with OSD security requirements, and to take advantage of the extensive functionality of the Microsoft SharePoint portal application.
There are several immediate advantages to the AT&L community by doing this migration:
Content can be reorganized by the user according to their area of interest, selecting functionality or service as focal points;
This is the first milestone in a plan to offer a personalized Acquisition Portal for AT&L users, so you can customize your workspace to more efficiently meet knowledge requirements in your daily work.
All current documents and reference information have been re-directed to the AKSS Portal. If any link fails to continue to function, please notify DAU immediately. Please take a few moments to test the functions. No content has been removed, though the location and presentation may have changed.
New Functionality: The front page content can be filtered by service or career field. Additional filtering functions are available in the AKSS Menu for News and Publications, AT&L Websites, and Guidebooks and Handbooks, in the AKSS Menu. Page content can be adjusted by selecting suggested reading, reader's choice, or recent contributions.
For general questions or to report a problem with this site, contact or email the Web Help Desk at issc@dau.mil or (703) 805-3459.

DEFENSE ACQUISITION GUIDEBOOK
FOREWORD
The Defense Acquisition System exists to manage the Nation's investments in technologies, programs, and product support necessary to achieve the National Security Strategy and support the United States Armed Forces. In that context, our continued objective is to rapidly acquire quality products that satisfy user needs with measurable improvements to mission capability at a fair and reasonable price. The fundamental principles and procedures that the Department follows in achieving those objectives are described in DoD Directive 5000.1 and DoD Instruction 5000.2. The Defense Acquisition Guidebook is designed to complement those policy documents by providing the acquisition workforce with discretionary best practice that should be tailored to the needs of each program.
Acquisition professionals should use this Guidebook as a reference source supporting their management responsibilities. As an "on-line" resource, the information is limited only by the user's interest or need. Some chapters contain general content; they provide individual topic discussions and describe processes and considerations that will improve the effectiveness of program planning. Some chapters may provide a tutorial on the application of these topics to the acquisition framework. Depending on the subject matter, a chapter may contain general background information, tutorial discussions, and/or discussions of the detailed requirements for each milestone decision and phase. All chapters contain non-mandatory staff expectations for satisfying the mandatory requirements in DoD Instruction 5000.2.
Each chapter is designed to improve understanding of the acquisition process and ensure adequate knowledge of the statutory and regulatory requirements associated with the process. Discussions, explanations, and electronic links to related information enable the "reader" to be efficient, effective, innovative, and disciplined, and to responsively provide warfighting capability. Each chapter lists potential ways the program manager or assigned manager can satisfy mandatory process requirements and meet staff expectations for other activities. Differences of view regarding discretionary practice will be resolved by the Milestone Decision Authority.
The Guidebook should be viewed as an electronic resource rather than a "book." The "reader" "navigates" the information instead of "leafing" through hundreds of physical, collated pages. Navigation is electronic movement through the reference system. There are three ways to view the information:

Mission Execution
-One of the cornerstone CoPs in the ACC (started in 2001)
--Significant partnering with Federal Government
-Process & Mission areas provide structure for CoP and have contributed to improved focus in DAU Courses
-Tightly integrated with DAU course material (and was first CoP to share actual course material as contributions on the ACC)

-One of the many “process and mission” areas in Contracting CoP, along with:

- **A-76, Competitive Sourcing Process**

- **ACE for Services**
- **ADR**
- **A/E & Construction Contracting**
- **Award & Incentive Fee Contracts**
- **CON Career Management**
- **Contingency Contracting**
- **Contract Closeout**
- **Contracting Officers Representative**
- **Contractors Accompanying the Force**
- **DoD Use of GSA Acquisition Support**
- **Emergency Response & Recovery Contracting**
- **Government Property**
- **Government Purchase Card**

Welcome to the PBL Toolkit Homepage

To begin using the PBL Toolkit, click here

Performance Based Logistics (PBL) is the preferred Department of Defense (DoD) product support strategy to improve weapons system readiness by acquiring a desired level of operational performance, capitalizing on integrated logistics chains and public/private partnerships. The cornerstone of PBL is the acquisition of weapon systems and equipment sustainment as an affordable, integrated package based on attaining output measures such as weapons system availability, rather than focusing on separate input measures, such as parts, training, maintenance and technical services.

In the PBL environment, a government/industry team is a key long-t
contractually and/or with performance agreements. The team, und
foundation of building trust whereby there is mutual accountability
supportability, and Total Ownership Cost (TOC) over the life cycle
or equipment program manager often does not have command auth
to attain desired levels of support. Under PBL, however, the mech
required to attain the prescribed performance, cost and customer

To assist the Program Manager in creating and implementing PBL s
provides the Program Manager with a comprehensive set of tools and references for integrating Performance Based Logistics into the logistical support of a weapon system. The toolkit systematically documents the strategy and necessary implementation actions for effective use of the PBL strategy to attain the desired levels of support performance, cost management and customer satisfaction.

To begin using the PBL Toolkit, click here to navigate to an interactive page consisting of a 12-step PBL methodology. Click on any of the 12 interactive ovals to navigate directly to a PBL step. Users may also navigate through the toolkit using the menu on the left side of the screen, or may navigate sequentially through the toolkit using the forward/backward/home buttons located below the text of each page.

Users may also interact with the PBL Toolkit by participating in discussion forums. For guidance on participating in a PBL discussion forum, click here. Users may also help grow the toolkit by adding reference materials using the "My Knowledge" feature. For guidance on using the "My Knowledge" feature, click here.

The PBL Toolkit also contains a library page that allows users to quickly navigate to all of the references contained in the toolkit. Users may locate references using the comprehensive master list, or may locate references by PBL Toolkit topic.

-PBL Toolkit is an example of one of our first experiments with Process Performance Learning Tools (PPLTs)
-Uses the ACC application
-Toolkit integrates an extensive amount of information into a logical, and easy to navigate tool
-All AKMS assets available as links from toolkit.

What's In The Future?

- **Increased Focus on Providing Engaged Learners What They Need at Their Point of Need**
- **Capturing and Managing ALL DAU Learning Assets**
- **Capturing and Managing ALL DoD AT&L Best Practices**
- **Developing a Big "A" Portal**
- **Advanced Search and Discovery**

Best Practices Clearinghouse

Defense Acquisition University

Useful Information

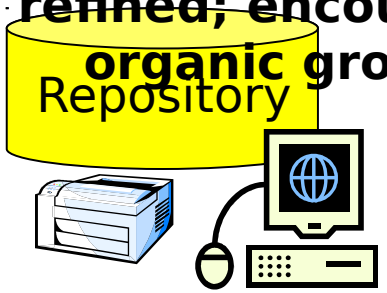
Help finding, selecting, and implementing practices appropriate to User's situation; fill the gap between "what" and "how"

A Single Source

For answers about practices, how to apply them, when they are good to use; lessons learned; and risks to avoid

Active Knowledge Base

Not just another practice list; experience data updated, expanded refined; encourages organic growth



Living Knowledge

Integration with DoD communities of practice (ACC) and experts

Validated practices

Consistent, verifiable
